Minor	Will follow soon												

* Signs: → Will be recognized as the following module...
 Will not be recognized since it is only part of the old or the new FPO

** Information on the module Research and Scientific Writing in Economics: If you change to the new FPO, you must pass the module after the change (first offered in winter semester 21/22). The only exception: if you have at least one more seminar than you need to complete your Master's degree according to the new FPO and you do not have to take any more exams, then you can have the surplus seminar credited for this module.
